Windsurfing is better than ever!!
 Advancement in windsurfing technology has made learning fast and easy. Boards are more stable, are faster to a plane, and have more range. Sails are easy to rig, are lighter, feel stable and can handle varied wind speeds. New gear can improve your skills quickly from beginner to intermediate, or from intermediate to advanced.

Start and improve your days on the water with the right equipment.

CAMP AND SCHOOL WINDSURFING

We are Canada's main supplier of camps and schools windsurfing equipment. We offer Camp Equipment Clinics and Demo Days for instructors. Just Call and set up your day.

MOTION MAMBO

Hifly boards are widely used at camps because they are constructed from polypropylene, a durable plastic material which is incredibly strong and long lasting. The board shapes are perfect for learning and progressing. The extra width lets the beginner easily balance and uphaul the sail. Multiple foot-strap placement allows campers to gradually reach higher speeds and promotes early planing and harness use. The boards come complete with 4-foot straps, a poly fin and long retractable centreboard. These are the two sizes of Hifly board most widely used at camps.

	MOTION	MAMBO
volume/litres	219	175
length/cm	290	275

\$1099

NAISH KAILUA

The Naish Kailua is a board every camp and cottage should have. The Kailua's size and shape make learning to windsurf easy and fun. The wide body design is stable for uphauling or even tandem windsurfing. The full padded foam deck makes the board extremely durable and easy on the knees and feet. The retractable centerboard and long mast track promote effortless upwind sailing. Colour coded deck corresponds with stages of beginner to advanced level sailing. Thanks to the rounded rails and scoop rocker the board is smooth turning and easy to plane. There are two sizes to choose from this year both with surprising and enlightening performance.

Learn To Windsurf - With These Rigs. (Mast, Sail, Boom)

MISTRAL PRODIGY

This board reintroduced the concept of one board for all wind conditions and applications. Perfectly stable for beginners to learn but also easily converts to a racing set with a competition tune up kit. Wide, thick rails make upwind sailing in light conditions fast and sleek. On plane the Prodigy takes off and will propel your sailing to new levels. New padded foam deck and seamless rails give the Prodigy a custom look and improved performance.

ENTRY LEVEL COTTAGE BOARDS

HAVE CENTREBOARDS FOR BEST UPWIND PERFORMANCE • STABLE. FAST, EASY TO LEARN - ALL SKILL LEVELS

mistral® N'TRANCE

Mistral has been making quality windsurfing boards since 1976. With 30 years of performance design and development you are guaranteed to have something special with every Mistral board. The N'TRANCE series has been our best selling cottage board because its easy to use performance promotes learning basic to intermediate skills quickly. Its wide deck is very stable for uphauling, and has superior upwind ability both with and without the centerboard, than most of its competitors. The N'TRANCE comes in two sizes and is packaged complete with high quality footstraps, poly centerboard and fin. Robust construction and full EVA softdeck make this board perfect for your friends and family.

FANATIC VIPER

Fanatic has refined its test winning VIPER shape for OG to make it even better for beginners and advanced sailors alike. The new straight outline shape and volume combination guarantees maximum sub planning performance. Advanced windsurfers can also enjoy the Vipers as light wind Freeride boards with plenty of footstrap options to choose from. Cad tuned rocker line creates incredible light wind lift for early planning and control.

This board could be the best allround performance for freeride sailing on the market. Quality straps, fins, centerboard, and footstraps included with these phenomenal boards.

Based on the same wide and voluminous designs of the STARTS, the RIO features super-fat rails in the mid-section for extra stability and a sand-proof daggerboard system. The full EVA deck ensures comfort, the multiple footstrap insert positions cater for beginners to advanced sailors, and the round thin tail outline makes carve jibing smooth and easy. The RIOS will allow you to learn and progress in windsurfing quickly and easily. With a Racing fin fitted, advanced windsurfers will be surprised with its speed and high performance capabilities. Finally a sexy board to start windsurfing with and rip with as intermediate.

8.0	223	508	490	\$639
8.5	234	517	490	\$679

Our Boardsports exclusive Aerotech sail comes direct from the factory to save you money. The Freeride II offers improved performance and shape from the top selling original. Fast, stable and easy to rig. There are no cambers in sizes 6.0 m² and down and 2 cams in larger sizes for extra stability and speed.

NORTH SAILS NATURAL

The new Natural has been completely redesigned to offer the perfect synthesis of speed, acceleration and easy handling. NO CAMS makes rigging fast and the new TT.TOP allows for more active twist in the sail which means better handling and stability. Larger sizes are designed for early planning while smaller sizes focus on draft stability for maneuvers and speed. 5 year warranty has improved with new double seam technology.

SLALOM SAILS

**FAST AND STABLE • HOLD ON IN MORE WIND
GO BIG AND PLANE EARLY • CAMS OR NO CAMS YOUR CHOICE**

NORTH SAILS DAYTONA

The Daytona is a 3 cam slalom sail built for speed and performance. Lighter weight and easier handling than its legendary predecessor, the Daytona's speed has no limits. With Bjorn Dunkerbeck, the most successful windsurfer of all time, at the helm of North Sails test team, these sails are the best built and tested on the market. Seven battens, 2 HYPER CAMS set new standards of rotational performance, and draft stability. Steve's favourite for blasting by pesky kites.

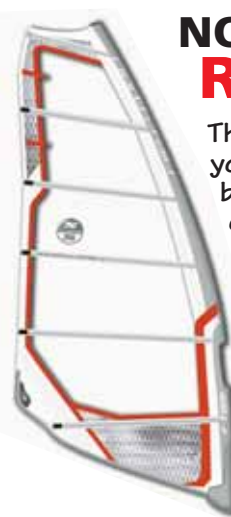

NORTH SAILS DAYTONA

9.5	244	549	490-CX/510	\$919

NORTH SAILS CROSSRIDE

The Crossride is the stand out no cam sail that has no limits to speed and handling. If you want the stability of command of the sail in high winds but not the hassles of rigging cams, this sail is your ticket. The Supercross has a far forward draft position, and seven super stiff battens that stabilizes you in gusts at break neck speeds. All sail size fit on a 460 mast for your convenience.

NORTH SAILS CROSSRIDE

Size (m ²)	Boom (cm)	Luff (cm)	Recommended Mast	BoardSports Price

WAVE SAILS

HIGH WINDS • BUMP AND JUMP • SUPERIOR DURABILITY

NORTH SAILS DUKE

Versatility is the key word for the DUKE as it excels in almost every discipline. Our test favourite for Great Lakes wave sailing and bump and jump maneuvers. Fast acceleration and constant drive provide the necessary speed in difficult on shore wave conditions. Perfect crossover sail for freestyle and wave, but with ample stability for slalom blasting. All Dukes can be used on a single 430 mast.

NORTH SAILS DUKE

Size (m ²)	Boom (cm)	Luff (cm)	Recommended Mast	BoardSports Price
4.5	159	404	400/430	\$689

6.4	184	472	430	\$789
6.9	190	494	430+CX460	\$819

NAISH SAILS AMP

The Amp is Naish's answer to one sail that can do it all. This sail is designed to empower all riders in waves, flatwater, or maneuvers. It offers great balance between low end power and top end speed. More durable with outside panels of Naish's exclusive X-Ply sail cloth, the Amp is a top choice for bump and jump blasting or slashing up mushy on shore wave conditions.

NAISH SAILS AMP

Size (m ²)	Boom (cm)	Luff (cm)	Recommended Mast	BoardSports Price

7.0	202	474	460	\$769

NAISH SAILS BOXER

If you're looking for an extra edge to nail your next big maneuver the Boxer is the answer. This sail has been redefining freestyle and wave performance for four years. The shortness of the boom and the mast give this sail a compact and forgiving feel. Match that with the Boxer's extra low swing weight and you're guaranteed to nail your next big wave of freestyle maneuver. 100% X-ply bomber construction offers lighter weight a softer feel than monofilm.

NORTH SAILS ICE

The ICE is a completely redesigned five batten wave sail for the aggressive experts that accept no compromise. Designed for World Cup competitions, it excels in every type of wave condition. The new double seam technology and reduced bend curve provides extreme durability and reduces sail stretch by 50%. All ICE sails can be used with 400cm mast.

BOOMS

ALL BOOMS
ARE SNAP LOCK
Waterproof
adjustment.

THE THING YOU HANG ON TO

Autima AluminumSport

Autima Pro Carbon

Stiff flex with continuous aluminum tubing, snap lock rear, and heavy duty clamp on head, gives this boom incredible value. Our most popular selling boom last year is made for us exclusively and comes direct from the factory that produces the brand name booms you've been using for years. One year warranty.

Built for those who'd love a carbon boom to lighten their rig, but not their wallets. The Autima Carbon booms are stiff and incredibly light. Increase the performance and lighten the your sail for easier uphauling and waterstarts.

Carbon Boom

Skinny Grip

Legendary Chinook quality, solid aluminum tail and easy to use snap lock adjustments. Skinny 1 1/8" grip.

Standard or reduced diameter grip. Custom alloy is stiffest aluminum boom Chinook has ever made. 62 cm of adjustment range. Head articulates and fits skinny and standard masts.

Reduced diameter grip with specialized tail widths. New modern bends optimize sail integration. Prepreg carbon is stiffer, lighter and bomber. Head articulates and fits skinny and standard masts.

ALL NEW

North Red Series

North Silver Series

The new red booms feature the SQUASH.GRIP and new Progression III head and double pin lock system to prevent twisting. Each size has an individual bending curve to match the needs of all sails.

The new silver booms are "cold welded" with glue developed by the aerospace industry. This insures the rigidity of and strength of a single piece boom. It also features the advanced developments included in the Red series.

"Squash Grip" it's slimmer where you grab for comfort without losing stiffness

RACE / SLALOM FINS

Sizes available(inches): 15.00/16.50/17.30/18.10/18.90 20.00/21.30/22.50

Series 2000 \$199 solid base
 This design is the ultimate freeride/race fin for early planing in light winds. Excellent upwind and top end speed. Ideal for sails 6.5 to 10.5m². Made with G-10 glass.

Sizes available(inches): 13.5, 14.5, 15.5, 16.5, 18, 19, 20.0, 21.3

Sweeper \$199 solid base
 The sweeper targets the new generation wide style boards. This freeride design covers a broad range of uses and compliments a wide board, making gybes smooth and easy. Use with sails 6.0m² to 10.5m². Made with G-10 glass.

Sizes available(inches): 13.5, 15.5, \$119 E-base \$139 solid base

Slalom Pointer Best priced polyester slalom fin.

WAVE CONVERTIBLE FINS

Sizes available(inches): 9.75/10.25/11.00/11.75/12.50/13.25 \$159 E-base \$179 solid base

Convert
 This proven convertible fin has a huge wind range. Perfect for onshore wave conditions, bump and jump, and freestyle sailing. Works with sails 4.0 – 7.0m². Made with G-10 glass.

Sizes available(inches): 8.50/9.00/9.50 \$119 E-base \$139 Power, Tuttle or Trimbox

Side On
 This wave fin excels in bay or lake type sailing. The slightly more vertical rake of this fin makes staying upwind easier, especially in onshore wave conditions. Works with sails 4.0 – 5.7m². Made with polyester glass.

Sizes available(inches): 7.25/7.75/8.25/8.75/9.25/9.75 \$129 E-base \$149 solid base

Enduro
 This wave design is wide in the base for holding power and soft and flexible in the tip for quick, slushy maneuvers. The Enduro gives you ultimate control in surf and chop. For sails 3.5 – 6.0 m². Made with G-10 glass.

HYDROTECH FIN'S

Sizes available(cm): 29 / 35 / 39 / 46 / 50 ON SALE.. \$129 Power or Tuttle box

This slalom freeride fin is a quality G-10 construction designed for early planing and slightly swept for maneuverability. Brought in factory direct to save you money. Perfect for the new widestyle boards.

Hydrotech Weed \$149 Power, Trim or Tuttle box
 Now a weed fin that doesn't drag weeds or your wallet down. G-10 construction construction is top quality. Available in three sizes 40 cm, 44 cm, or 48.

Blade Weed WEED FINS

Sizes available(inches): 10.00/11.00/12.50/13.50/14.50/15.50/16.50/17.50 \$189 E-base \$209 solid base

This is a weed fin for speed freaks. It is built with G-10 glass so it can have a narrow chord width and is angled deeply to shed weeds. For sails 4.0 and up. A must if you sail at Rondeau, Keswick or Skugog.

Sizes available(inches): 16.50/18.00 \$179 E-base \$219 solid base

Santa Barbara Weed
 Modeled after the "Blade Weed", this fin has less rake (5 degrees) and is ideal when weeds are not so thick, like coastal seas. Less rake enhances the performance of the fin. Great for sails 6.5 and up. Made with G-10 glass.

COTTAGE REPLACEMENT

Sizes available(inches): 13.00 Only \$49 one size

Plastic Fin
 This is a plastic replacement fin that fits almost all older model windsurfers out there. Includes nut & bolt
